WEEKLY JOURNAL, DEVOTED TO HAWAIIAN PROGRESS.

HONOLULU, WEDNESDAY, FEBRUARY 4, 1874.

WHOLE NO. 473.

News Paragraphs.

Charles Barleigh, of Massachusetts, has invented an instrument that will greatly facilitate mining, tunneling mountains, etc. It is a drilling machine, worked by compressed air that will bore holes two inches in diameter, clearing itself as it goes, at the rate of one foot per, minute in the bardest granite. It has been tried thoroughly in England, put to the severest tests and pronounced an entire success.

Bishop Whipple's work among the Chippewa Indians is warmly commended by the people of all denominations. A Roman Catholic paper says: "He is looked upon by all our Chippewas as a father in whom they have full confidence, and no one else in this country has so much influence over them. Such a man can do more toward civilizing this people than a host of untried and untested ministers. They have had missionaries amongst them to my knowledge since 1828 -Methodists, Catholics and Congregationalists. All of them failed to accomplish the object of their mission, and one after another gave up the field and retired from the country. The Episcopal Church then undertook the work, standing slone for a long time, trembling with doubt, but finally succeeded.

The Vienna Congress has assented, by unanimous vote, to the proposition that it is desirable, with a view to the exchange of weather reports, that at least one uniform observation of such character as to be suitable for the preparation of synoptic charts, be taken and recorded daily and simultaneously at us many stations as practicable throughout the world. The formal announcement of this principle, with such sanction, will tend directly to an exchange of signal service and weather reports between all the civilized nations. It is interesting, in reference to American repreparing to establish a system of storm warnings and weather reports for China and the Chinese coust of the Pacific.

The produce of the direct and indirect taxes in France, for the first nine months of last IMPORTERS AND WHOLESALE DEALERS year, is published in the Journal Official. The former brought in 485,000,000f., being 38,500,000f. more than the sum calculated on for that period. Last year, although the harvest was better, the surplus at the corresponding time was only 26,-500 000f. The same may be said as to the cost of collection.
